

# TerraSAR-X Science Service System

The TerraSAR-X Science Service System allows for the submission and evaluation of proposals, as well as for the submission of reports.

- New interested scientists need to **register** before submitting proposals.
- Registered principal **investigators** of TerraSAR-X data may enter new and maintain existing proposals. A general proposal submission is possible at any time. The required language is English.
- Anybody may receive information about accepted proposals and review the corresponding executive summaries. Currently available are pre-launch, CSA-DLR-2010, TSX-Archive-2012, TSX-New-Mode-2013, TSX-Archive and general proposals.
- The pdf document: How to submit a TSX proposal gives a short description of the corresponding procedure.
- Usually investigators will get the data for the costs of fulfilling the user request. Discounts will be applied for larger order volumes, and for dedicated research programs and institutions contributing to the TerraSAR-X mission, especially by financial or operational support. Special conditions might be applied to dedicated calls.  
The current **COFUR pricelist** is applicable to proposals presented to the permanent submission interface.
- The download of TerraSAR-X data requires special security regulations which are described in the **FAQ** document. There are also some remarks on ordering in EOWEB in it.
- All relevant documents are available in the **documentation** section.
- For any questions please send an email to the science coordinator tsx.science@dlr.de.

## TerraSAR-X/TanDEM-X Science Team Meeting 2016

The presentations of the meeting are now available for download here.

### Open calls for proposals:

Type of call	Description	Open until
<u><b>AO FOR SPECIAL TERRASAR-X PRODUCTS (TSX-Special-Products)</b></u>	Provision of TerraSAR-X like processed products from the TanDEM-X pursuit monostatic Phase and experimental TerraSAR-X products. It is strongly recommended to check	<b>unlimited</b>

## TerraSAR-X Science Service System

	<p>the <b>EOWEB catalogue</b> for data availability before submitting a proposal. The following collections are applicable:</p> <ul style="list-style-type: none"> <li>• TanDEM-X Pursuit TSX-1 Like</li> <li>• TanDEM-X Pursuit TSX-1 Like Experimental</li> <li>• TSX-1 Experimental Products</li> </ul>	
<p><b><u>AO FOR UTILIZATION OF THE TERRASAR-X ARCHIVE (TSX-Archive)</u></b></p>	<p>Provision of archived TerraSAR-X data. (data must be older than 18 months at the time of ordering). It is strongly recommended to check the <b>EOWEB catalogue</b> for data availability before submitting a proposal.</p>	<p><b>unlimited</b></p>
<p><b><u>GENERAL PROPOSAL SUBMISSION</u></b></p>	<p>The general proposal submission interface is open during the whole life time of the TerraSAR-X mission.</p>	<p><b>unlimited</b></p>
<p><b>AO FOR UTILIZATION OF THE NEW MODES OF TERRASAR-X (TSX-New-Modes-2013)</b></p>	<p>Provision of products acquired in the new modes 'Staring Spotlight' and '6 Beam ScanSAR' (Wide ScanSAR). (A reasonable number of the established modes of TerraSAR-X can be requested for comparison).</p>	<p>closed</p>
<p><b>AO FOR EXPERIMENTAL PRODUCTS (DRA-2010)</b></p>	<p>Data provision of the dual receive antenna campaign 2010 (11.04.2010 to 13.05.2010). See AO for Special TerraSAR-X Products</p>	<p>closed</p>
<p><b>AO FOR UTILIZATION OF THE TERRASAR-X ARCHIVE (TSX-Archive-2012)</b></p>	<p>Provision of archived TerraSAR-X data (data must be older than 18 months at the time of ordering).</p>	<p>closed</p>
<p><b>AO FOR RADARSAT-2/TERRASAR-X INITIATIVE (CSA-DLR-2010)</b></p>	<p>Interested scientists from Canada and Germany are invited to submit proposals to the joint AO of the Canadian Space Agency (CSA) and DLR.</p>	<p>closed</p>
